

EAGLE, ANT & EMU

Mark Yettica-Paulson, 2026

POISON

Poison Relational View is able to accept challenges with conflict. Here we give sceptical and critical thought to bad intentions.

Value: Critique. Virtue: Warning. Vice: Cynicism

EAGLE

Eagle View is able to see high above the activities on the ground. Eagle can zoom in and see far off into the distance in all directions. Eagle can see patterns, dangers and opportunities from an expansive perspective.

Value: Big Picture. Virtue: Overseeing. Vice: Aloof.

EMU

Emu View is able to see at ground level and far off distances. Emu can notice the movement and direction from Eagle and connect with the ground-level environment of Ant. Emu is grounded and uses multiple senses.

Value: Multi-sensing. Virtue: Grounded. Vice: Distraction.

ANT

Ant View is able to see only directly in front and immediate surrounds. The big picture is beyond the vision of Ant. It has single-minded focus and requires direction markers and quick communications at ground-level.

Value: Focused. Virtue: Details. Vice: Obsession.

CLEAN

Clean Relational View is able to accept challenges with openness. Here we give benefit of doubt and remain focused on good intentions.

Value: Openness. Virtue: Hope. Vice: Weakness
